TIME: 9:00 UNTIL 1:00 (Buffet lunch included)
 PLUS optional networking workshop

NISP  TM
 NATIONAL INDUSTRIAL SYMBIOSIS PROGRAMME

www.nisp.org.uk

WHAT IS THIS EVENT ABOUT?

With the support of Chemicals Northwest, the Chemical Synergy Workshop aims to bring together organisations involved in the chemical industry in a structured practical forum whereby companies can network, share ideas, opportunities and match their resource 'haves' with other companies' resource 'wants' . The event is the perfect opportunity for solution providers to meet with potential customers.

The event will provide an opportunity to discuss issues currently affecting the manufacturing sector, and will help attending organisations improve resource flows and improve business efficiency.

WORKSHOP PROGRAMME

08:30	Registration, coffee and exhibition
09:15	Introduction & welcome Jenny Clucas, CEO, Chemicals Northwest
09.30	Update on Regulations affecting chemicals industry Dave Forster, Environment Agency

1:00	Networking session Optional session for delegates to continue discussions with key contacts made at the event

If you would like to attend, please complete the form below

DEADLINE FOR COMPLETED FORMS: Friday 3rd July 2009

ORGANISATION PROFILES:

Chemicals Northwest is a support organisation for chemical industries based in North West England. It works to increase the positive impact of chemical companies and to ensure they are well equipped for future growth. Chemicals Northwest is funded by industry and the regional development agency, and facilitates the delivery of a number of programmes within the skills, innovation and sustainable development themes.

Groundwork Merseyside are the local deliverers of the Enworks funded business support programme. The programme offers **free** resource efficiency support to businesses on Merseyside in order to improve environmental performance and identify cost savings.

The National Industrial Symbiosis Programme (NISP) is a **free** business opportunity programme funded by Defra. Through NISP, companies can achieve substantial cost savings, generate sales from new markets and contribute towards creating an environmentally sustainable economy. What makes NISP different to other resource efficiency initiatives is that it deals with ALL TYPES OF RESOURCE – materials, energy, water AND supports the sharing of assets, logistics and expertise.

NISP and Groundwork Merseyside are working together to maximise the support available to the businesses attending the event.

FEEDBACK FROM OUR LAST WORKSHOPS

Our networking events have consistently generated over 100 resource matches in just 100 minutes of networking!

Delegate feedback:

“Good networking, valuable information, good contacts, good understanding of costs”

“Ideal at a time when all businesses are finding it difficult”

“Very informative, excellent speakers, good diverse mix of delegates creating good networking opportunities”
